WEBIDEAPRO, THE KNOWLEDGE-LANGUAGE & THE I-WORKSHOP METHOD: A STORY OF INNOVATION

Let's ponder for a moment and imagine that you are facing your desk, a space of creation and innovation. You're also aware that other knowledge workers – or rather your colleagues – are facing and working on that same space, an ordinary desk. If you were to collide these workspaces in a virtual world, you'd fashion an environment ready to burst with creativity. In this scenario, you're working in an environment where you and others "know" of this shared virtual desk. You also know that you will share, work towards a common goal, and garden the content in unison, making decisions that will in turn create new ripples of ingenuity. WebIDEApro orchestrates innovation through teamwork.

"Orchestrating Innovation
through Teamwork"

WebIDEApro

Innovate in 3 Steps!

Capture

1

Begin by declaring ideas that you have in mind. Through this process, you can organize and your thoughts by extracting the essential bits of information. The nodes you create in your virtual space represent a concise mental model that is capable of embodying true meaning. The beauty of WebIDEApro is that it can be shared with others or used for personal productivity. Illustrate collective group thinking or your personal system – the choice is yours.

Collaborate

2

Collaboration begins by sharing your virtual space with others in your entrusted network. The virtual space can be thought of as a communication channel that enables sharing, collaboration, and discussion with other team members. Use it for brainstorming, planning, or simply organizing tasks. Within this virtual space, you can also chat with your collaborators and make decisions on the fly. Why bother with email when all the information you'll need for action has already been drawn, discussed, pruned, and perfected?

Innovate

3

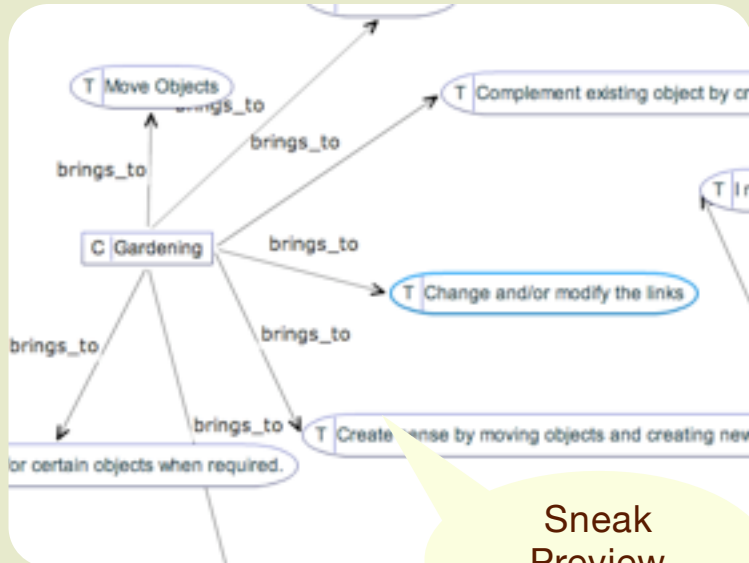

Let's ponder for a moment: As the ideas begin to emerge virtually, the collaborators in your network are in a position to react in real-time. They can now garden the ecosystem and play with the ideas that arise. Suddenly, new links are created, new associations emerge, and the ecosystem evolves into a mature system of complex thoughts, plans, and newly co-constructed knowledge. WebIDEApro simply promotes innovation practices and creates an ecosystem where the norm is to push towards improvement.

Why Try WebIDEApro?

- Collaborate and see what others are doing in real time with our Real-Time Server push technology.
- Works on demand with a reliable & secure cloud server.
- Automatically indexes your information for quick searches.
- Access your information from the cloud anywhere and everywhere
- Supports activities and tasks that require management with knowledge.
- Encourages transparency and democratic work practices.

5 Easy Requirements

- Free WebIDEApro account
- Access to the internet
- Internet Navigator with a FLASH Plug-in
- MAC, LINUX, or Windows OS
- A collaborative team spirit
